Healy School's Unique Program

Our program offers a unique resilience and self-reliance curriculum for K-5 students. Resilience is having positive outcomes in the face of adversity.

The science of childhood resilience focuses on skill development (for example, problem solving), supportive relationships, and science (for example, brain science). Students learn how their brains develop, and what they can do to become "strong and smart" in life.

Healy School will offer a robust arts program (movement like dance), strong supports for ELL students, and a strength based approach to special education. We appreciate everyone learns in a different way!

Healy School will offer an inclusive, rigorous, and resilience minded education that will provide ALL students with the academic and social-emotional skillset to excel in school and beyond.

What are the differences between Charter Schools and Regular Public Schools?

- Both are types of public schools
- Both receive public funding
- Both are open to the public
- Neither charges tuition
- Both must uphold a set of standards in order to receive funding
- As you can see they are both Free (no additional charge)

Our Program

RESILIENCE EDUCATION

We believe that resilience is the foundation for a healthy and productive life. The ability to "bounce back" from challenges is essential so your children can pursue their unique aspirations, and fulfil their potential.

OUR SCHOOL

Our program will focus on helping your child succeed through small class sizes, personalized attention, a wide offering of creative arts, and extra support for ELL students. Unique about HS is our culture, values, and resilience classes weekly.

LOCATION

We are reviewing possible locations in Novato, but are optimistic to find a space to meet our emerging school and community's needs.
